INDEX TO VOLUME VI.

A.

Abert, J. W., Tour to New Mexico, 376.
Absorption of carbonic acid by liquids, *W. B.* and *R. E. Rogers*, 96.
Academy of Sciences, Philadelphia, Proceedings of, 156, 304.
Acid, carbonic, absorption of, by liquids, *Rogers*, 96.
——, sulphuric, manufacture of, *A. A. Hayes*, 113.
——, sulphuric, &c., manufactured by action of steam on sulphates, &c., 260.
——, aspartic, 420.
Adams, C. B., on a fractured and repaired Argonauta, 137.
——, new species of Haliotis, 138.
Aerolites, see *Meteorites*.
Agassiz, L., Principles of Geology by, noticed, 151.
——, water tubes of fishes, 431.
——, structure of the foot in Embryo-birds, 432.
Alabama, Geology of, *C. S. Hale*, 354.
Alexander, J. H., tension of vapor of water, 210, 317.
Alexander, S., on the physical phenomena dependent upon the progressive motion of light, 397.
Algæ, U. S., localities of, *J. W. Bailey*, 37.
——, on collecting and preserving, *W. H. Harvey*, 42.
Algeria, galena and iron ore in, 271.
Alkalies, organic, composition of, *A. Laurent*, 420.
American Phil. Soc., Philadelphia, Proceedings of, 156.
—— Association for the Promotion of Science, notice of, 294, 393.
—— Academy of Arts and Sciences, Proceedings of, 304.
—— —— ibid, Memoirs of, 456.
Amherst Cabinet and Observatory, 293.
Analysis, organic, new modes in, 422.
Animals, sense of pain in, *G. R. Rowell*, 89.
——, copper in the bodies of, 422.
——, inorganic matter in the blood of, 422.
Anorthite, in Maine, 425.
Ant nests, Cremastochilus in, *S. S. Haldeman*, 148.
Ants, black, tenacity of life in, 292.
Anthony, J. G., impression of the soft parts of an orthoceras, 132.
Anthracite, blast furnace for smelting iron with, *S. S. Haldeman*, 74.
Archiac, notice of a work by, on the Progress of Geology, 134.
Arctic Expedition in search of Sir John Franklin, 149, 446.
Argonauta fractured and repaired, *C. B. Adams*, 137.
Arsenic in chalybeate waters, 422.
Artificial building material, 145.
—— ——, called Lithoceramic, 446.
Artificial paving material, of India rubber, 446.
Asia Minor, emery in, 272.
Asparagine and aspartic acid, 420.
Association, American, time of meeting and officers of, 294.
——, ——, notice of meeting in 1848, 393.
——, ——, time of the meeting in 1849, 401.
——, British, at Swansea, 1848, 445.
Asteroids, orbits of, *B. A. Gould*, 28.
Asteroid, tenth, Diana, 278.
——, new, Metis, 140, 278, 437.
——, Hebe, elements of, 437.
Astringent substances for tanning, mode of testing value of, 423.
Atlantic, facts concerning, *M. F. Maury*, 400.
Atmidoscope, 296.
Atomic volume of sulphur and nitrogen, on anomalies in, *T. S. Hunt*, 170.
Atoms, divisibility of, 329.
Audouard, arsenic in chalybeate waters, 422.
Auriferous glass, 255.
Australia, copper mines, 134.
Autographs, collection of, for sale, 448.

B.

Babbage, C., on the Temple of Serapis, noticed, 152.
Babinet, on a planet beyond Neptune, 438.
Bagrationite, a new mineral, 267.
Bailey, J. W., localities of Algæ, 37.
Balanus, eyes of, *J. Leidy*, 136.
Barry, M., physiological discoveries, 433.
Barytic water and salts of baryta, preparation of, 423.
Beaches, lake Superior, 19.
Beavers, in Mississippi, *D. D. Phares*, 297.
Bent's Fort, notes on the region, 387, 389.
Bernard, C., pancreatic secretion, 276.
Berzelius, obituary of, 448.
Bird, G., Natural Philosophy by, noticed, 153.
Birds, structure of foot in embryos of, and bearing of the facts on their classification, *L. Agassiz*, 432.
Blast furnaces for iron, *S. S. Haldeman*, 74.
Blood, new mode of analyzing inorganic matter in, and on metals in, 422.
Blum, J. R., on Pseudomorphism, 267.
Bohemia, metallurgical industry of, 146.
Bond, discovery of the eighth satellite of Saturn, 437.
Bosphorus, level of, 294.
Boston Society of Natural History, 299, 455.
Botanical works noticed,
——, Carices Americæ, of *H. P. Sartwell*, 149.
——, Gray's Genera Illustrata, 300.
——, Ralfs' British Desmideæ, 302.
Botany of New England, *E. Tuckerman*, 224.
British Association, notice of meeting, 1848, 445.
Brocklesby, J., influence of color on dew, 178.

Brocklesby, J., Elements of Meteorology by, noticed, 299.
Bromine from the bittern of salt works, 293.
Brongniart, A., plants of different geological epochs, 120.
Bronzing metals, new mode of, 423.
Building material, action of frosts on, 285.
—— ——, artificial, 145.
Bullets, new mode of making, 288.
Burr, E. F., on the Neptunian theory of Uranus, 236.

C.

Cabot, on Sterna cantiaca, and a new wren, 136.
——, American and European oyster-catcher, different species, 433.
California, Upper, *Fremont's* report on, 280.
——, ——, notices of, 376.
——, ——, quicksilver mines in, 270.
Caloric, see *Heat*.
Calotype on glass, 259.
Carices Americæ, &c., by *H. P. Sartwell*, noticed, 149.
Caricography, *C. Dewey*, 244.
Caspian Sea, level of, 148.
Chemical classification, *T. S. Hunt*, 170.
Chihuahua, silver and copper mines of, 384, 385.
Chili, coal in, 146.
Chlorastrolite, a new mineral, 270.
Chloroform, new process for, 256.
Christy, D., letters on geology, 298.
Cinnabar in California, 270.
Classification, zoological, embryology a basis of, *M. Barry*, 433.
—— of birds, observations on, *L. Agassiz*, 432.
Climate, as indicated by opening and closing of the Hudson river, 295.
—— of Utica, 296.
Coal in Chili, 146.
——, Statistics of, by *R. C. Taylor*, noticed, 150.
—— in New Mexico, 383, 385, 389.
Coffin, J. H., winds of the northern hemisphere, 398.
Coke, new property of, *J. Nasmyth*, 424.
Cold of Utica, 296.
Collections of minerals, coins, &c., for sale in Baltimore, 447.
Color, influence of, on dew, *J. Brocklesby*, 178.
Comet, new, discovered by Dr. Petersen, 437.
Commercial Review, de Bow's, 293.
Conchology,—a new Haliotis, 138.
—— of Connecticut, *J. H. Linsley*, 233.
Copernicus, opinion of, on light of planets, 140.
Copper mines of South Australia, 134.
—— —— in California, 388.
—— —— in Chihuahua, 385.
—— ore, alleged insolubility of, in hydrochloric acid, 395.
Copper and zinc, carbonate of, 426.
Copying engravings, new mode of, *N. de St. Victor*, 258.
Cremastochilus in ant nests, *S. S. Haldeman*, 148.
Cretaceous formation in Texas, *F. Roemer*, 23.
Cretaceous formation in New Mexico and Western Missouri, 377, 390.
Currents and winds of the ocean, *M. F. Maury*, 399.
Curtis, M. A., contributions to American Mycology, 349, 444.

D.

Dalyell, J. G., work on rare and remarkable animals, noticed, 452.
Dana, S. L., on lead diseases, 299.
Dana, J. D., Manual of Mineralogy, 302.
Dead Sea. *Molyneux* on, 146.
——, level of, 148.
——, expedition to, under Lieut. Lynch, 441.
Declivity of slopes, 133.
Delesse, effects of fusion on density of rocks, 133, 423.
Density of rocks, effects of fusion on, 133, 423.
Deschamps, copper in the bodies of animals, 422.
Desmideæ, British, *J. Ralfs* on, noticed, 302.
Dew, influence of color on, *J. Brocklesby*, 178.
——, observations on, *Melloni*, 418.
Dewey, C., Caricography, 244.
——, ice a conductor of galvanism, 253.
——, Grove's battery with water used with the zinc cup, 253.
——, oxyd of zinc in the porous cup, 254.
Diamond, oxydation of, in the liquid way, *Rogers*, 110.
Dimorphism of zinc, palladium, iridium, tin, 255.
Dip of needle, variations in, *Quetelet*, 446.
Divisibility of magnitude, *A. MacWhorter*, 329.
Dolomisation, observations on, 268.
Drift, wave of translation as connected with, *W. Whewell*, 115.

E.

East Indies, observations on, 157.
Economic geology, museum of, 446.
Electrical theories, on, *R. Hare*, 45.
Electro-magnetic rotation of ray of light, 153.
—— —— balance, 258.
Electro-telegraph, history of, 439.
Embryology, a basis of classification, *M. Barry*, 433.
Emerald Nickel, *B. Silliman, Jr.*, 248.
Emery in Asia Minor, 272.
Emory, W. H., tour to California, 386.
Engelmann, notes on U. S. ferns by Prof. Kunze, communicated by, 80.
English prefixes from the Greek, *J. W. Gibbs*, 206.
Engravings, new mode of copying, 258.
Expedition in search of Sir John Franklin, 149, 446.
—— to Dead Sea, under Lieut. Lynch, 441.
—— ——, ibid, under Lieut. Molyneux, 146.
Eyes of the barnacle, *J. Leidy*, 136.

F.

Faraday, on the rotation of a ray of light by electro-magnetism, 153.
Feldspar decomposed by steam, to obtain the alkali, 260.

Fergus, T. H., mica from hornblende, 425.
Ferns of the United States, on some, *Kunze*, 80.
Fishes, water tubes of, *L. Agassiz*, 431.
Fitz, H., telescopes of, 437.
Footprints, *D. Marsh* on fossil, 272.
Fossils of South Alabama, 355.
Franklin, Sir John, expedition in search of, 149, 446.
Fremont, J. C., Report by, on California, noticed, 280.
Fuchs's method of analyzing iron ores, observations on, *Profs. Rogers*, 395.
Fusion, effects of, on density of rocks, 133.

G.

Galena in Algeria, 271.
Galvanism, ice a conductor of, *C. Dewey*, 254.
——, Grove's battery, mode of using, *C. Dewey*, 253.
——, ——, ——, oxyd of zinc in the porous cup, 254.
——, purifying liquids by, 260.
Gelatine, chemical nature of, *T. S. Hunt*, 259.
Geological epochs, changes in the plants of different, *A. Brongniart*, 120.
—— map from soundings, 149.
Geology of Texas, *F. Rœmer*, 21.
—— of Panama, *E. Hopkins*, 123.
—— of Malay peninsula, 129.
——, work on the progress of, by *d'Archiac*, 134.
——, Christy's letters on, noticed, 298.
—— of South Alabama, *C. S. Hale*, 354.
—— of New Mexico, 377.
——, Museum of Economic, England, 446.
Gerhardt, C., on atoms, 176.
——, on salts, 337.
Gibbs, J. W., English prefixes derived from the Greek, 206.
Gilliss, expedition of, to South America, to observe Venus, with reference to the solar parallax, 143.
Glass, auriferous, 255.
——, photography on, 259.
Gold, extraction of, *C. T. Jackson*, 187.
—— in New Mexico, 383.
—— in Russia, 275.
Gould, A. A., Principles of Zoology by, noticed, 151.
——, on some shells of Connecticut, collected by *J. H. Linsley*, 233.
Gould, B. A., orbits of the asteroids, 28.
Grains produced in the United States in 1847, 288.
Gray, A., Genera Illustrata of, noticed, 300.
Grove's battery, with only water used with the zinc cup, 253.
—— ——, oxyd of zinc in the porous cup, 254.
Gun-cotton, employment of, in mining, 256.
Gutta percha, 135.
—— ——, *E. N. Kent* on, 246.
Gypsum in New Mexico, 383, 389, 390.

H.

Haidinger's Vienna Transactions, noticed, 154.
——, on dolomisation, 268.
Haldeman, S. S., blast-furnace for smelting iron with anthracite, 74.
——, Cremastochilus in ant nests, 146.
Hale, C. S., geology of South Alabama, 354.
Haliotis, new species, *C. B. Adams*, 138.
Hare, R., on electrical theories, 45.
——, on the explosion, causing the fire at New York of 1845, 281.
Harvey, W. H., on collecting and preserving Algæ, 42.
Hausmann, on the cause of the irised colors of minerals, 254.
Hayes, A. A., manufacture of sulphuric acid, 113.
Heat, latent and specific heat of bodies, *C. C. Person*, 111.
—— slowly transmitted through clay, *J. Nasmyth*, 119.
——, effects of, on density of rocks, 133.
——, power of radiating, of different substances, 255.
——, nocturnal radiation of, *Melloni*, 418.
Hebe, elements of orbit of, 437.
Henry, J., on the Smithsonian Institution, 305.
Hermannsen, A. N., work by, on Malacozoa, noticed, 151.
Herrick, E. C., shooting stars of August, 1847, 278.
——, —— —— ——, 1848, 279.
Hopkins, E., isthmus of Panama, 123.
Howardite, a new mineral, 253, 405.
Hudson river, time of opening and closing, 295.
Hunt, T. S., on chemical classification, and on the anomalies in atomic volume of sulphur and nitrogen, 170.
——, chemical nature of gelatine, 259.

I.

Icebergs, temperature of sea near, 143.
Idocrase in Sanford, Maine, 425.
Iguanodon, jaws and teeth of, *G. A. Mantell*, 429.
Indian Archipelago, 157.
Iodine, new property of, *St. Victor*, 258.
Irised colors of minerals, 254.
Iron, blast furnace for smelting, with anthracite, 74.
Iron ores, on Fuchs's method of analyzing, *Rogers*, 395.
Isomorphism, *Scheerer* on, 57, 189.

J.

Jackson, C. T., extraction of gold, 187.
——, tellurium in Virginia, 188.
Jacksonite, a new mineral, 269.
Jordan, Lieut. *Molyneux* on, 146.
——, Lieut. *Lynch* on, 441.

K.

Kent, E. N., on gutta percha, 246.
Koninck, L. de, work by, on Fossils, noticed, 454.
Kumptolite, 446.
Kunze, on some U. S. ferns, 80.

L.

Lake Superior, meteorology of, and causes of change of level, *W. W. Mather*, 1.

Lake, Great Salt, or Utah, Rocky Mountains, 280.
—— Superior, levels of, 19.
Lapis lazuli in Siberia, 425.
Laurent, A., theory of binary molecules, 170.
——, composition of organic alkalies, 420.
Laurent, on sponge, 277.
Lawrence, A., donation to Harvard University, 149.
Lead diseases, *S. L. Dana* on, 299.
——, yield of, in Great Britain, 445.
Leidy, on the eyes of the Balanus, 136.
Levels, ancient, of Lake Superior, 19.
—— of Dead Sea, and Caspian, 148.
—— of Black Sea, 294.
Liebig, work on chemistry of food, noticed, 149.
Liebnerite, a new mineral, 275.
Light, ray of, rotated by electro-magnetism, 153.
——, physical phenomena dependent upon the progressive motion of, *S. Alexander*, 397.
Linsley, J. H., shells of Connecticut, 233.
Lithoceramic, 446.
Lithographic limestone, 446.
Lunar, see *Moon*.
Lynch, expedition to Dead Sea, 441.

M.

MacWhorter, A., on the divisibility of magnitude, 329.
Magnetic perturbations, 296.
—— needle, variations in dip of, *Quetelet*, 446.
Malay peninsula, geology of, 129.
Mantell, G. A., jaws and teeth of the Iguanodon, 429.
Markoe's mineralogical cabinet, 297.
Marsh, D., on fossil footprints, 272.
——, tenacity of life in black ants, 292.
Martins, C., temperature of sea near icebergs, 143.
Mather, W. W., meteorology of Lake Superior, 1.
Maury, M. F., winds and currents of the ocean, 399.
Melloni, on nocturnal radiation, 418.
Méne, C., electro-magnetic balance, 258.
Mercury, mines of, in Upper California, 270.
——, ores of, in coal formations, 426.
Metallurgical industry of Bohemia, 146.
Meteor, *D. D. Phares* on, 148.
——, see *Shooting stars*.
Meteoric iron of Seeläsgen, in Brandenburg, 426.
Meteorite of Castine, Me., C. *U. Shepard*, 251.
—— of Arkansas, 297.
——, Juvenas, on Rammelsberg's analysis of, *C. U. Shepard*, 346.
——, Braunau, on Fischer's examination, *C. U. Shepard*, 348.
Meteorites, Report on, with accounts of several, *C. U. Shepard*, 403.
Meteorology of Lake Superior, *W. W. Mather*, 1.
——, Brocklesby's Elements of, noticed, 299.
Metis, the planet, 140, 278, 437.
Mexico, New, notice of the soil, mines, &c., 376.
——, mines of, and modes of reducing ores, *S. W. Raines*, 427.
Mica in Siberia, 425.
—— originating from hornblende, 425.
Millon, E., on urea, 256.
——, on analysis of inorganic matter in blood, and on metals in this fluid, 422.
Mineralogical cabinet, Markoe's, 297.
—— —— at Baltimore, for sale, 447.
Mineralogy, Dana's Manual of, noticed, 302.
Mineral waters, Rocky and California Mountains, 389, 390.
—— ——, arsenic in chalybeate, 422.
Minerals, isomorphism in, *Scheerer*, 57, 189.
—— from near Lake Superior, *J. D. Whitney*, 269.
——, irised colors, cause of, 254.
——, new, from Texas, *C. U. Shepard*, 249.
——, pseudomorphism of, Blum's work on, noticed, 267.
——, Bagrationite, 267; Carbonate of copper and zinc, 426; Chlorastrolite, 270; Cinnabar in California, 270; Emerald nickel, 248; Emery in Asia Minor, 272; Galena and iron ore in Algeria, 271; Gold in Russia, 275; Gypsum in New Mexico, 384, 389, 390; Howardite, 253, 405; Idocrase in Maine, 425; Jacksonite, 269; Lapis lazuli in Siberia, 425; Liebenerite, 275; Molybdenite in Maine, 425; Samarskite, 266; Williamsite, 249.
Mining, employment of gun-cotton in, 256.
Mines of New Mexico, 383.
Molybdenite in Sanford, Maine, 425.
Molyneux on the Dead Sea, 146.
Moon, observations during eclipse of, Sept., 1848, *L. M. Rutherford*, 435.
Morlot, A. von, on dolomisation, 268.
Mosses, on American, *M. A. Curtis*, 349.
Mountains, Rocky, notices of, and section, 376, 389.
Museum of economic geology, England, 446.
Mycology, contributions to American, *M. A. Curtis*, 349, 444.

N.

Nasmyth, J., new property of coke, 424.
——, slow transmission of heat through clay and sand, 119.
Neptune, *S. C. Walker*, 277, 396.
Neptunian theory of Uranus, researches on, *E. F. Burr*, 236.
New York, Report of Regents of University of, 298.
Nicklès, J., dimorphism of zinc, 255.
——, crystallized hydrated oxyd of, 257.
Nitrogen, anomaly in atomic volume of, *T. S. Hunt*, 170.

O.

Obituary notice of *J. Richardson*, 297.
—— of *Berzelius*, 448.
Ocean, Atlantic and others, facts concerning, 399.
Oregon, remarks on, 280.
Orthoceras, impression of soft parts of, 132.
Oyster-catcher, American and European, different species, 433.

P.

Pain in animals, *G. R. Rowell*, 89.
Panama, geology of, *E. Hopkins*, 123.
Pancreatic secretion, 276.
Patent Office Report, 303.
Paving material of India rubber, called Kumptolite, 446.
Pennsylvania and Ohio, topography of, with reference to railroads, *S. W. Roberts*, 397.
Person, C. C., latent and specific heat of bodies, 111.
Petersen, discovery of a new comet, 437.
Phares, D. D., beavers in Mississippi, 297.
Photography on glass, 259.
Piria, on asparagine, 420.
Planets, asteroid, orbits of, *B. A. Gould*, 28.
——, opinion of *Copernicus* on light of, 140.
Planet Hebe, elements of, 437.
—— Metis, discovery of, 140, 278.
—— ——, elements of, 437.
—— Neptune, researches on, *E. F. Burr*, 236.
—— ——, ——, *S. C. Walker*, 277.
—— Diana, 278.
—— Saturn, eighth satellite of, 437.
—— supposed, beyond Neptune, speculations on, *Babinet*, 438.
—— ——, ibid, *Le Verrier*, 439.
Plants of different geological epochs, *A. Brongniart*, 120.
—— of New England, on some, *E. Tuckerman*, 224.
Potassium, preparation of ferridcyanid of, 423.
Pseudomorphism of minerals, *Blum* on, noticed, 266.

Q.

Quicksilver mines in Upper California, 270.
—— in coal formation, 426.

R.

Radiation of heat, nocturnal, *Melloni*, 418.
Railroads in Pennsylvania and Ohio, 397.
Raines, G. W., mines of Mexico, 427.
Ralfs, J., on British Desmideæ, 302.
Ray Society, 446.
Regents of the University of New York, Report, 298.
Richardson, J., death of, 297.
Roberts, S. W., Topography of Pennsylvania and Ohio, 397.
Rock, slide of one, in South Carolina, 443.
Rocks, effects of fusion on density of, 133, 423.
——, decomposition of, *Profs. Rogers*, 396.
Rocky Mountains, section of, and notices, 389.
Rœmer, F., geology of Texas, 21.
Rogers, W. B. and *R. E.*, absorption of carbonic acid by liquids, 96.
——, oxydation of the diamond in the liquid way, 110.
——, decomposition of rocks, 396.
Rogers, R. E. and *J. B.*, on the alleged insolubility of copper in hydrochloric acid, and on Fuchs's method of analyzing iron ores, 395.
Rosse's telescope, 139.
Rowell, G. R., beneficent distribution of the sense of pain, 89.
Russia, yield of gold in 1846, 275.
Rutherford, L. M., observations during the lunar eclipse of September, 1848, 435.

S.

Salt, amount of, in seas, 148.
Salt Lake, Great, of Upper California, 280.
—— —— in California, 388.
—— —— of New Mexico, 390.
Salts, researches on, *C. Gerhardt*, 337.
Samarskite, new mineral, 266.
Saturn, eighth satellite of, 437.
Schœrer on Isomorphism, 57, 189.
Schlieper, A., oxydation of uric acid, 363.
Sea, Dead, see *Dead Sea.*
Selenium, 254.
Serapis, *Babbage* on, noticed, 152.
Shell of an Argonaute, fractured and repaired, *C. B. Adams*, 137.
Shells of Connecticut, on some, collected by *J. H. Linsley*, 233.
Shepard, C. U., new minerals from Lancaster Co., Penn., 249.
——, meteorite of Castine, Maine, 251.
——, on Rammelsberg's analysis of the Juvenas meteorite, 346.
——, on Fischer's examination of the Braunau meteorite, 348.
——, Report on meteorites, 402.
Shooting stars of August, 1847, *E. C. Herrick*, 278.
—— —— ——, 1848, *E. C. Herrick*, 279.
—— —— ——, ——, seen in France, 439.
Silliman, Jr., B., on emerald nickel, 248.
Silurian system, in Mexico, 379, 380.
Silver mines of Chihuahua, 384.
—— ores, reduction of, in Mexico, *G. W. Raines*, 427.
Slide of a rock, in South Carolina, 443.
Slopes, angle of, 133.
Smithsonian Institution, 288, 305.
Solar parallax, expedition to South America to observe Venus with reference to, 143.
Spitzberg, temperature of sea near icebergs, 143.
Sponge, observations on, by *Laurent*, 277.
Springs, hot, in California, 389.
—— in New Mexico, sulphur, 389, 390.
Star, supposed new, 140.
Steam, decomposition of mineral substances and salts by, 260.
Sterna cantiaca, *Cabot*, 136.
Stone, artificial, 145.
——, ——, called lithoceramic, 446.
Sulphur, anomaly in atomic volume of, 170.
——, in organic substances, new mode of estimating, 422.
Sulphuric acid, manufacture of, *A. A. Hayes*, 113.

T.

Talus slopes, 133.
Tanning, on tests of astringent substances for, 112.
Taylor, R. C., work by, on coal, noticed, 150.
Telegraph, electric, history of, 439.
Telescope, Rosse's, 139.
Telescopes, Fitz's, 437.

Temperature of Utica, 296.
——, as indicated by opening and closing of the Hudson, 295.
Tension of vapor of water, *J. H. Alexander*, 210, 317.
Texas, geology of, *F. Roemer*, 21.
Thompson, D. P., work of, on Meteorology, noticed, 154.
Tin mines of Malacca, 130.
——, dimorphous, 255.
Topography of Pennsylvania and Ohio, 397.
Trilobites, large, of Ohio, 431.
Tuckerman, E., on some New England plants, 224.
Types, new mode of making, 287.

U.

United States, grain produced in, in 1847, 288.
Uranus, researches on Neptunian theory of, *E. F. Burr*, 236.
Urea, estimation of, and its presence in the vitreous humor, 256.
Uric acid, oxydation of, by potassa and ferridcyanid of potassium, *A. Schlieper*, 363.
Utica, heat and cold of, 296.

V.

Vapor of water, tension of, *J. H. Alexander*, 210, 317.
Venus, observed by expedition sent to South America, to determine solar parallax, 143.

W.

Wackenroder, H., preparation of salts of baryta, and barytic water, 423.
Walker, S. C., on Neptune, 277, 396.
Warrington, R., on testing astringent substances for tanning, 112.
Water, tension of vapor of, *J. H. Alexander*, 210, 317.
Wave of translation, *W. Whewell*, 115.
Webster, J. H., idocrase in Sanford, Me., 425.
Weidenbusch, mode of estimating inorganic substances, 422.
Whewell, W., wave of translation, 115.
Whitney, J. D., minerals from near lake Superior, 269.
Wilkes, C., medal of Royal Geographical Society, awarded to, 297.
Williamsite, a new mineral, 249.
Winds of the northern hemisphere, *J. H. Coffin*, 398.
—— and currents of the ocean, *M. F. Maury*, 399.
Wislizenus, A, tour in Northern Mexico, 376.
Wren, new species of, *Cabot*, 136.

Z.

Zeuglodon, *C. S. Hale*, 361.
Zinc, dimorphous, 255.
Zoology, Principles of, by *Agassiz* and *Gould*, noticed, 151.
